

# Banlaw ResTrack™ API

Banlaw is proud to offer a highly customisable API that transfers data from your Fluid Resource Management Software directly into your company SAP database, without the need for manual data manipulation or entry.

## The Problem

The transfer of data between enterprise software solutions is often a manual process requiring significant human resource investment and is prone to human errors and delays in data availability.

## The Solution

Banlaw works closely with client organisations to develop their bespoke API solution. Whether your requirement is the automated transfer and integration of refuelling transaction data, or you require complete visibility of tank levels for all fluid types along with alarms and stock reorder notifications, we've got you covered. Our ResTrack API development process is highly flexible.

## Key Benefits

- ▶ Integrate data into a centralised system, creating a single source of truth and delivering optimum visibility
- ▶ Make proactive, data-driven decisions and minimise business risk
- ▶ Gain the ability to combine fluid consumption, maintenance, production, and other data assets, unlocking new business insights and improvement opportunities
- ▶ Avoid the ongoing human resource costs associated with frequent manual data entry
- ▶ Remove human errors. No mistakes. No misinterpretation
- ▶ Improve data accuracy, timeliness, and system reliability through automation
- ▶ Enhance the efficiency of reporting. Get the data you need when you need it
- ▶ Achieve an excellent ROI from improved productivity, compliance, reduced business risk and cost savings

## Simple Business Case

Existing Banlaw ResTrack™ customers save around 3 hours of effort per worksite per week by avoiding the manual collection, aggregation, manipulation, and entry of data between business systems. **Our ResTrack SAP API offer pays for itself from the time savings alone!**

Assuming 3 hours of manual data entry per week.

- 3h x AUS \$60 x 52 weeks = **AUS \$9,360 savings per year**

Description	Price
Standard SAP API - sends transaction data from ResTrack RMS to SAP database*	\$5,000 AUD
Add-on with Tank Levels	\$2,000 AUD
Add-on with Alarms / Notifications	\$2,000 AUD
SAP to ResTrack data transfer is also available on request. Contact us to discuss your specific project requirements.	

\*The Banlaw ResTrack™ API adheres to the REST architecture.
