

Meet ResTrack Lite by Banlaw

Fuel Management Made Simple

Banlaw proudly presents ResTrack Lite, the newest addition to our Fuel Management System (FMS) product line. For efficiency made simple, ResTrack Lite is the cost-effective, plug-and-play system to streamline your fuel management.

Why Choose ResTrack Lite?

Visibility that creates efficiency

ResTrack Lite allows you to control your fuel consumption with visibility and accuracy. Ditch the paper documents and error-laden manual reporting to save time and money.

Innovative and secure

Born from the toughest environments, our cutting-edge technology ensures unparalleled security and accountability. ResTrack Lite redefines access control, granting exclusive entry to authorised personnel and approved fleets only.

We make it simple

ResTrack Lite is a turnkey fuel management solution that is effortless to set up and use. It integrates seamlessly with your existing system, so you can enjoy the benefits of streamlined reporting from day one.

Global expertise

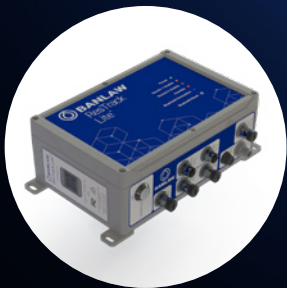

ResTrack Lite was created by Banlaw, the pioneers of Fluid Asset Intelligence with over 45 years of expertise in delivering premium solutions to major global players.

Join us now. Be among the first to experience the simplicity of ResTrack Lite. Visit banlaw.com or contact our sales team to learn more and enjoy the efficiencies of Banlaw ResTrack Lite™ today.

What's Included

Hardware

The complete package includes: (4 parts) – Controller, Actuated Ball Valve, Flow Meter and Level Sensor. The ResTrack Lite system is fully adaptable to your existing componentry. The controller is FCC & RCM certified, and all supplied hardware is rated IP66.

Controller

Level Sensor
